ANALYTIC SUBJECT INDEX

Aggregation, diffusion limited (see *Irreversible growth*) **151A** (1988) 207
Arrhenius expression (see *Viscosity of water*) **151A** (1988) 246
Atom–field interaction
– Atoms in coherent and incoherent fields. I. Microscopic theory of Einstein's rate equation - Hassan and Bullough **151A** (1988) 397
– Atoms in coherent and incoherent fields. II. Resonance fluorescence in mixed coherent–chaotic fields - Hassan and Bullough **151A** (1988) 425

BBGKY-hierarchies
– —and Vlasov's equations in postgalilean approximation - Orlov and Pavlotsky **151A** (1988) 318
Boiling in liquids
– A quantum field theory of phonons and— - Kitamura **151A** (1988) 303
Bond percolation
– A Dynamical flux expansion for the three-dimensional—problem - Parris et al. **151A** (1988) 144

Chaotic field (see *Two-level atom, driven*) **151A** (1988) 397
Charged particle gas
– Analytical solutions of the Rayleigh flow problem for a highly rarefied gas of a nonhomogeneous system of charged particles - Khater and El-Sharif **151A** (1988) 457
Charged particle system
– Theory of frequency dispersion of the conductivity of a system of charged particles. I. Linear response theory and perturbation theory with respect to the particle–photon interaction - Bobrov and Trigger **151A** (1988) 482
– Theory of frequency dispersion of the conductivity of a system of charged particles. II. Calculating the long-wavelength limit of longitudinal and transverse conductivities - Bobrov and Trigger **151A** (1988) 495
Clustering, quasi-periodic
– Population model with quasi-periodic clustering - Bebie and Marchand **151A** (1988) 281
Coagulation, diffusion induced
– Simulation of the front deformation by diffusion induced coagulation - Aertsens **151A** (1988) 193
Coherent–chaotic fields, mixed (see *Two-level atom, driven*) **151A** (1988) 425
Conductivity
– Theory of frequency dispersion of the—of a system of charged particles. I. Linear response theory and perturbation theory with respect to the particle–photon interaction - Bobrov and Trigger **151A** (1988) 482
– Theory of frequency dispersion of the—of a system of charged particles. II. Calculating the long-wavelength limit of longitudinal and transverse conductivities - Bobrov and Trigger **151A** (1988) 495
Cyclotron resonance
– Phonon effects on the—for a many-body system: A generalized quantum Langevin equation approach - Hu and O'Connell **151A** (1988) 33

Damping, nonlinear (see *Spin systems, driven*) **151A** (1988) 17

Deformation of a front
– Simulation of the front deformation by diffusion induced coagulation - Aertsens **151A** (1988) 193
Density matrix formulation
– Correlation-operators in— - Levin et al. **151A** (1988) 447
Dielectric breakdown (see *Irreversible growth*) **151A** (1988) 207

Einstein rate equation (see *Two-level atom, driven*) **151A** (1988) 397
Electron–phonon system (see *Cyclotron resonance*) **151A** (1988) 33
Energy exchange, periodic (see *Frequency converter*) **151A** (1988) 467
Erratum
– — to Physica A 146 (1987) 634, Critical end point behaviour near and away from a tricritical point - Kumar **151A** (1988) 513

Fluid–wall interactions
– New developments for a repulsive external potential. Self-consistent treatments - Boudh-Hir **151A** (1988) 370
Fluorescence, resonance (see *Two-level atom, driven*) **151A** (1988) 425
Flux expansion (see *Percolation, three-dimensional bond*) **151A** (1988) 144
Fractals, Laplacian
– Theory of Laplacian fractals: diffusion limited aggregation and dielectric breakdown model - Pietronero et al. **151A** (1988) 207
Frequency converter
– The effect of periodic energy exchange in the— - Abdalla et al. **151A** (1988) 467
Frequency dispersion (see *Conductivity*) **151A** (1988) 482
Frequency dispersion (see *Conductivity*) **151A** (1988) 495

Grassmannian models
– Some results for—on a lattice - Brihaye and Kosinski **151A** (1988) 385

Harmonic oscillator
– Kinetic theory in the weak-coupling approximation. II. A classical—model - Tzanakis **151A** (1988) 90
Helium–xenon mixture
– Comment on light scattering studies of disparate mass gas mixtures: helium–xenon - Letamendia **151A** (1988) 509
Hydrodynamic interactions
– Many-body—in suspensions - Felderhof **151A** (1988) 1

Inhomogeneous fluid (see *Fluid–wall interactions*) **151A** (1988) 370
Intertwining operators (see *Schrödinger equation, non-linear*) **151A** (1988) 167
Irreversible growth
– Theory of Laplacian fractals: diffusion limited aggregation and dielectric breakdown model - Pietronero et al. **151A** (1988) 207

Kinetic theory (see *Rayleigh flow problem*) **151A** (1988) 457
Kinetic theory (see *Weak-coupling approximation*) **151A** (1988) 61
Kinetic theory (see *Weak-coupling approximation*) **151A** (1988) 90
Knudsen gas, molecular
– Orientational dependence of magnetic field effects in a molecular Knudsen gas - Horne et al. **151A** (1988) 341
Kramers equation (see *Harmonic oscillator*) **151A** (1988) 90

Langevin equation, generalized
– Phonon effects on the cyclotron resonance for a many-body system: A generalized quantum Langevin equation approach - Hu and O'Connell **151A** (1988) 33
Laplace equation (see *Fractals, Laplacian*) **151A** (1988) 207
Light scattering
– Comment on—studies of disparate mass gas mixtures: helium–xenon - Letamendia **151A** (1988) 509

Majority rule (see *Renormalization, real space*) **151A** (1988) 139
Maximum entropy principle
– Correlation-operators in density matrix formulation - Levin et al. **151A** (1988) 447
Methane (see *Viscosity of methane*) **151A** (1988) 153
Migdal renormalization (see *XY model, three-dimensional*) **151A** (1988) 124
Molecule–surface interaction (see *Knudsen gas, molecular*) **151A** (1988) 341
Monte Carlo simulation (see *Deformation of a front*) **151A** (1988) 193

Open systems
– Kinetic theory in the weak-coupling approximation. I. Formal theory and application to classical— - Grecos and Tzanakis **151A** (1988) 61
Oscillation viscometer (see *Viscosity of water*) **151A** (1988) 246

Particle–photon interaction
– Theory of frequency dispersion of the conductivity of a system of charged particles. I. Linear response theory and perturbation theory with respect to the— - Bobrov and Trigger **151A** (1988) 482
Percolation, three-dimensional bond
– A Dynamical flux expansion for the three-dimensional bond percolation problem - Parris et al. **151A** (1988) 144
Phonon, longitudinal (see *Boiling in liquids*) **151A** (1988) 303
Polarization, angular momentum (see *Knudsen gas, molecular*) **151A** (1988) 341
Population lattice model (see *Clustering, quasi-periodic*) **151A** (1988) 281
Postgalilean approximation (see *BBGKY-hierarchies*) **151A** (1988) 318
Pulsation (see *Frequency converter*) **151A** (1988) 467

Quantum field theory (see *Boiling in liquids*) **151A** (1988) 303
Quantum interference (see *Density matrix formulation*) **151A** (1988) 447
Quantum inverse method (see *Schrödinger equation, non-linear*) **151A** (1988) 167

Rarefied gas (see *Rayleigh flow problem*) **151A** (1988) 457
Rayleigh flow problem
– Analytical solutions of the—for a highly rarefied gas of a nonhomogeneous system of charged particles - Khater and El-Sharif **151A** (1988) 457
Renormalization, real space
– Optimal analytic second order real space renormalization - Cordero and Molina **151A** (1988) 139
Rheology (see *Hydrodynamic interactions*) **151A** (1988) 1

Schrödinger equation, non-linear
– Intertwining operators and the quantum inverse method for the non-linear Schrödinger equation - Davies and Gutkin **151A** (1988) 167
Spin dynamics
– Equation of motion of a driven spin coupled to a bath - Zhang **151A** (1988) 349

Spin systems, driven
– Nonlinear damping in driven spin systems - Zhang and Zauermann **151A** (1988) 17
Spin–bath coupling
– Equation of motion of a driven spin coupled to a bath - Zhang **151A** (1988) 349
Spin–lattice models (see *Grassmannian models*) **151A** (1988) 385
Superfluorescence
– —in a system with external sources - Bogolubov et al. **151A** (1988) 293
Suspension, fluid (see *Hydrodynamic interactions*) **151A** (1988) 1

Thomas–Fermi model
– Verification of the virial theorem in the— - Pacheco and Sañudo **151A** (1988) 113
Two-level atom, driven
– Atoms in coherent and incoherent fields. I. Microscopic theory of Einstein's rate equation - Hassan and Bullough **151A** (1988) 397
– Atoms in coherent and incoherent fields. II. Resonance fluorescence in mixed coherent–chaotic fields - Hassan and Bullough **151A** (1988) 425

Vibrating wire viscometer (see *Viscosity of methane*) **151A** (1988) 153
Virial theorem verification (see *Thomas–Fermi model*) **151A** (1988) 113
Viscosity of methane
– The—at 25°C up to 10 kbar - van der Gulik et al. **151A** (1988) 153
Viscosity of water
– Accurate meausurements of the—in the temperature range 19.5–25.5°C - Berstad et al. **151A** (1988) 246
Vlasov kinetic equations
– BBGKY-hierarchies and Vlasov's equations in postgalilean approximation - Orlov and Pavlotsky **151A** (1988) 318

Weak-coupling approximation
– Kinetic theory in the—. I. Formal theory and application to classical open systems - Grecos and Tzanakis **151A** (1988) 61
– Kinetic theory in the—. II. A classical harmonic oscillator model - Tzanakis **151A** (1988) 90

XY model, three-dimensional
– Analysis of the Migdal transformation for models with planar spins on a *d*-dimensional lattice - Schoenmaker **151A** (1988) 124

Z(N)-transitions (see *XY model, three-dimensional*) **151A** (1988) 124
